REGULATION

FOR IMPROVING THE SITUATION OF

REGIMENTAL SURGEONS AND MATES

REGIMENTAL HOSPITALS

WAR OFFICE, LONDON

AND SOLD BY

J. WILKINSON, 45, ROYAL EXCHANGE, LONDON

1870

GEORGE,

WHEREAS it hath appeared to Us, that great Benefit may accrue to Our Service, by improving the Situation of Regimental Surgeons and Mates belonging to the more permanent Establishment of Our Army, and by making certain Alterations in the Mode of supplying and managing their Regimental Hospitals; Our Will and Pleasure therefore is;

A 3

I. That

Allow-
ances
to Regi-
mental
Surgeons
to cease.

I. That, in all our Regular Corps of Cavalry and Infantry, all Allowances on Account of Medicines and Hospital Expences (as well the annual, as the occasional Allowances during Encampment), together with Perquisites or Gratuities of every Kind, shall cease and determine on the 25th of December next: from which Time Medicines shall be supplied to the respective Corps by our Apothecary-General; and the Hire of Hospitals, and all Medical Expences attending Detachments and Recruiting Parties, shall be defrayed at the Public Charge, under the Regulations hereinafter mentioned or referred to.

REGI-
MENTAL
SUR-
GEONS.

Increase
of Pay,
&c.

II. Each Surgeon, from the Period above-mentioned, shall have the Pay of Twelve Shillings per Diem in the Cavalry, and Ten Shillings in the Infantry; to be divided into Subsistence and Arrears, in the following Manner, viz.

Nine

Nine Shillings Subſiſtence, and Three Shillings Arrears, in the Cavalry; and Seven Shillings and Sixpence Subſiſtence, and Two Shillings and Sixpence Arrears, in the Infantry; the Whole to be liable to the uſual Deductions. He ſhall have his Choice of Quarters according to his Standing in the Regiment, with reſpect to the Captains; and, in Time of War, ſhall have the ſame Baggage and Forage-Money as Captains; but in no Shape whatever ſhall he have any Claim to Military Rank in Our Army, different from what the Surgeons of Regiments are now entitled to.

III. And for the greater Encouragement of well-educated and able Perſons to engage in this Line of Our Service, We are graciously pleaſed to declare, that every Regimental Surgeon, after having been Twenty Years on

Allow-
ance to
retired
Surgeons.

Full Pay in our Regular Army (including Mate's Service) shall be permitted to retire on an Allowance of Five Shillings a Day for his Life, to be granted to him upon Production of Certificates of his good Conduct from the Commanding Officers under whom he shall have served.

SUR-
GEONS
MATES.

Commis-
sions, Pay,
&c.

OUR FURTHER PLEASURE IS, That the Surgeons Mates of Our Regular Regiments shall be appointed by Commissions from Us, or from Our Generals having Authority from Us to grant Commissions; that they shall in future be denominated Assistant Surgeons; and that their Pay, from the 25th of December next inclusive, shall be Five Shillings a Day; except in Time of War and on Foreign Stations, when they shall receive Seven Shillings and Sixpence per Diem; liable in each Case to the usual Deductions. Each Assistant Surgeon

Surgeon shall have his Choice of Quarters according to his Standing in the Regiment with respect to the Subaltern Officers.

V. Lastly, We are pleased to approve the Instructions to Regimental and Assistant Surgeons which have been prepared by the Physician and Surgeon-General of Our Forces and the Inspector of Regimental Hospitals, and which are hereunto annexed. AND WE do hereby require all Commanding Officers of our Regular Corps, and all Regimental and Assistant Surgeons, to govern themselves in their respective Duties touching the Care of the Sick Soldiers and the Management of Regimental Hospitals, by the Regulations contained in this Our Royal Warrant, and in the Instructions thereunto subjoined.

Instructions of the Army Medical Board to Surgeons and Assistant Surgeons.

Given

Given at Our Court at St. JAMES's,
this 30th Day of *November*, 1796,
in the Thirty-seventh Year of Our
Reign.

BY HIS MAJESTY'S COMMAND,

W. WINDHAM.

INSTRUCTIONS

FROM THE

ARMY MEDICAL BOARD

TO THE

REGIMENTAL SURGEONS

AND

ASSISTANT SURGEONS,

REFERRED TO IN THE FOREGOING WARRANT.

INSTRUCTIONS

FROM THE
COMMISSIONER OF THE ARMY

ARMY MEDICAL BOARD

REGIMENTAL SURGEONS

ASSISTANT SURGEONS

REFERRED TO IN THE FOREGOING WARRANT

INSTRUCTIONS, &c.

HIS Majesty having been graciously pleased to order that every Regular Corps shall be provided with an airy, roomy, and healthily-situated Regimental Hospital, where good water may be easily procured; if the Regiment is not in Barracks, where a part of the Barrack, or other convenient place, is allotted by the Barrack-Master-General for the reception of the Sick, such Hospital must be provided by the Regimental Surgeon, or (in his absence) by the Assistant Surgeon; in which case, immediate reports of the situation, size, rent, &c. are to be made to the Inspector of Regimental

mental Hospitals; and, unless on very pressing emergencies, no engagement is to be entered into without the permission of that Officer.

During encampment, an hospital tent is allowed in aid of an Hospital, but not in lieu of one; and great attention should be paid to the choice of the ground where the tent is to be pitched, which, if possible, should be near the Regimental Hospital, and not in the rear of the lines; a trench is to be dug round it for carrying off the water; and, for the inside, straw worked up in thick matts should be laid upon dry sand, or gravel, under every palliass: where matts cannot be made, some fresh straw should be placed under each palliass, and confined by boards or wicker-work, twelve or fourteen inches high, placed round the side of the bed; the straw to be changed once a fortnight: at fur-

theft. The

The windows of the Hospital to be opened, and the walls of the tent to be lowered, every day, to admit fresh air; and, during this interval, the beds of the Convalescents, and of others who can sit up, to be made; and no man who is able to sit up, to be allowed to sit or lie upon his bed during the day; occasionally, in fine weather, the rugs, blankets, &c. to be hung out on bushes or laid upon the ground, and often turned.

The sides and floors of the wards, if of wood, to be washed occasionally with soap and water, and sprinkled with vinegar; the walls, if plaistered, to be frequently white-washed; and if a contagious disease prevails, the nitrous acid (formed by mixing half an ounce of vitriol acid, and half an ounce of nitre, and placing them in a sand heat), should be evaporated in each ward, every day; and in such case, upon the death of a patient, the whole of his bedding to be well steeped in running water, or in a
 7 tub,

tub, then dried and baked in an oven, and afterwards washed with soap and water, before it is either used again, or put into the regimental store : and when the disease is subdued, the like to be done with the bedding of the whole ward.

The straw about the bed of a man who dies, to be taken out and burnt, and the place, or bed where he lay, to be sprinkled with vinegar.

No knapsacks or accoutrements to be permitted to hang up, or lie in the wards : the non-commissioned officer attending the Hospital is, on the admission of the patients, to take charge of the knapsacks and accoutrements, and to be responsible for them.

The Hospital is never to be crowded, every man to have at least the space of five feet allotted to his bed ; and every man a bed to himself.

Every Regimental Hospital will be provided with a steady Serjeant ; with one orderly

orderly man, or more, according to the exigency of the service; and one woman nurse; and for every ten men confined to bed by fever, an additional nurse, or orderly man; and all the patients who are able, are every morning and evening to assist in cleaning and airing the hospital, carrying away dirt, &c. and by every means to assist the helpless.

Every patient to be provided with a clean shirt, and clean pair of stockings if he can sit up, twice a week, or oftener if necessary; and with clean palliass cases and clean sheets once a fortnight, or as often as there is occasion; the Patients' heads should be combed, and their faces and hands washed every morning, and their feet once a week in warm water. They should be shaved twice, or three times, a week.

At his admission into the Hospital, every Patient is to be made extremely clean with warm water and soap, and have a clean shirt.

**Contagi-
ous Dis-
eases.**

All men with infectious diseases, putrid fevers, fluxes, small-pox, or measles, to be removed immediately from Camp, or Barracks, to a separate room in the Hospital, or, if the Hospital is full, to a separate house, or, in certain cases of exigency, to an Hospital Tent: such men, when become convalescent, ought not to be reported too soon for duty.

**Punished
Men.**

Punished Men also should be placed in a separate ward, and the linen and beds frequently changed.

Itch.

Men with the Itch should be cured in a spare tent in Summer, or in a separate room of the Hospital: such men should have each a clean shirt, and clean pair of sheets; and four frictions, or smearing the body all over four times, at six hours distance, (lying in bed the whole time), with the Army Laboratory Ointment, will, in most instances, eradicate the complaint: they must then be well washed in warm water, and put on all clean linen and

and clothes: their clothes must previously be well scoured with soap and water.

Whenever this complaint prevails in a Regiment, there should be a weekly inspection of all the men by the Surgeon or the Assistant Surgeon.

All men with Venereals, should be confined to the Hospital.

The Commanding Officer should be applied to for a Guard of one or two Centries to every Regimental Hospital, and the same to every Hospital Tent.

The Regimental Surgeon, or the Assistant Surgeon, should visit the Hospital at least twice every day, and the Quarters of one of them should be very near to the Hospital; when in Camp, one of them should sleep there.

A Book is to be kept at every Regimental Hospital, for the admission and discharge, and for the Cases, of Patients; in which the Name, Age, Disease,

Monthly
Report

Venereal.

Guard.

Surgeon
and Assist.
ant visit-
ing.

Hospital
Book.

Monthly
Report.

case, and Treatment, should be fully inserted; a Report to be made by the 20th of every Month to the Army Medical Board, a Copy of which is to be sent to the Inspector, according to the usual Form, together with any Observations upon particular Cases; and especially if a Contagious Fever or Epidemic prevails, it is required that the Surgeon, or Assistant, shall give his Opinion fully of the probable Cause, and whether such cause is removeable; and also an account of the Treatment.

Examina-
tion of
Recruits.

They are to be particularly attentive to the examination of Recruits, when such are brought before them; not to suffer any Man to pass, who has not at his examination been stripped of all his clothes, to see that he has no Rupture, to ascertain as far as possible that he has the perfect use of his Eyes and Ears, and the free motion of every Joint and Limb; that he has no Tumours nor diseased enlargement of Bones or Joints; no sore
Legs;

- Legs; nor marks of an old fore: that his appearance is healthy; that he is neither consumptive, nor subject to fits:—with any of these Defects, the Man is to be rejected as unfit for Service.

Inoculation of Recruits at convenient times and places, is to be recommended by the Surgeon and Assistant Surgeon to the Commanding Officer.

Inoculation.

An Army Dispensatory being established, a Copy of which is annexed, it is expected that Medical Officers of all descriptions will, as nearly as possible, adhere to the List there given.

Army Dispensatory.

Each Regimental Surgeon, when provided with a Chest of Medicines, an Invoice of which (calculated for a Corps of 1000 Men) is also annexed, is required once every year, to make a Return to the Inspector of Regimental Hospitals, under cover to the Secretaty at War, of the Medicines used by him during the preceding Twelve

Returns of Medicines.

Months, and of what remain, and this Return to be accompanied with an Affidavit taken before a Magistrate, that none of the Medicines have, to his knowledge, been converted to private purposes, or applied to any use but that of the Regiment, or to some other Military Service, for which he must produce the special Orders of the Commanding Officer or of one of the Army Medical Board.

Additional Medicines.

Should a Regiment be placed in an unhealthy situation, or from any prevailing Disease should the Surgeon's stock of a particular Medicine be exhausted before the next yearly supply becomes due, he is to apply to the Inspector of Regimental Hospitals, under cover to the Secretary at War, for a fresh supply; the existence of such cause for the extraordinary consumption of the medicines to be certified by the Commanding Officer. If a Medical Officer desires

desires to use a Medicine not in the Dispensatory, he must procure it at his own expence.

When Wine is indispensably necessary, Wine. it should be given as long as the case absolutely requires, but no longer; and it must be given by the Surgeon, or Assistant Surgeon, himself, unless previously mixed by them with Medicine or Food; and Porter, or good Beer, should, whenever the case will admit of it, be given in lieu of Wine: whenever Wine is necessary, a return of the consumption thereof is to be made weekly to the Inspector General.

Each Regimental Surgeon will be furnished with four sets of hospital bedding for every hundred men on home service; and with six sets, on foreign service; and other Hospital Necessaries in proportion: a Return is to be made once a year of the number worn out; and the unserviceable stores to be inspected by a proper person appointed for that purpose,

Hospital
Stores.

pose, before they are exchanged for new ones.

Instru-
ments.

Each Regimental Surgeon is expected to have one complete Set of capital, and one of Pocket Instruments, according to the Lists annexed; and the Assistant Surgeon, one complete set of Pocket Instruments; the whole to be provided by themselves, and kept in order at their own expence, in readiness for inspection, whenever called upon; and the List of them is regularly to be inserted in the yearly return.

Care of
Detach-
ments.

Every Regimental and Assistant Surgeon is expected to take care of the Sick of any other regiment, detachment, or recruiting party, men on furlough, &c. in the place where their own Regiment lies, or within ten miles distant, provided no Hospital Mate of a district is nearer than themselves, for which journeys the necessary travelling expences will be allowed; if applied to from a greater distance, they are to make

make the best terms in their power with a Resident Practitioner for the care of the Men in question, making a Report thereof to the Inspector of Hospitals as above.

The Medical and Hospital Expences of the Regiments, and of their respective detachments and parties, are to be inserted in the annual Public Accompts of the respective Corps.

L. PEPYS,
J. GUNNING,
T. KEATE.

make the best terms in their power with
a Resident Practitioner for the care of
the Men in question, making a Report
thereof to the Inspector of Hospitals as
above.
The Medical and Hospital Expenses
of the Regiments, and of their respective
detachments and parties, are to be in-
serted in the annual Public Accounts
of the respective Corps.

THE
GUNNING
T. K. A. L.

THE
DISPENSATORY.

TO prevent uselefs and extravagant demands for obsolete, expensive, and inefficacious Medicines from the different General Hospitals, and to limit the Practice of Regimental Surgeons and Mates to the use of the most approved and powerful Medicines, the Army Medical Board have drawn up the following List, from which General Hospitals are to be supplied, in the quantities properly adapted to the numbers on Service, and from which Invoices will be formed for Regimental, Voyage, and Detachment Chests. The Medicines

Medicines are classed under seven heads, according to their different properties, an Eighth is added for Miscellaneous Articles not reducible to the above classes. By this plan the Prescriber sees at one view, what means he has to produce the effects he wishes, no time will be lost in looking over every Article of Medicine in his possession, his decision will be expeditiously made, and his practice will become more rational.
